

Surfaces (Paperback)

By Lecturer School of Chemical Sciences Colin Barnes, Senior Lecturer Department of Chemistry Gary Attard

Oxford University Press, United Kingdom, 1998. Paperback. Book Condition: New. 242 x 188 mm. Language: English . Brand New Book. This primer provides an introduction to the subject of surfaces at the level of undergraduates and first year postgraduates. There are three chapters, the first concerns basic thermodynamic material used to understand the properties of surfaces including; surface tension, Gibbs adsorption, surface pressure and surface phase equilibria, surfactants and micelles, wetting, detergency, and contact angle. The second chapter concentrates on gas adsorption at solid surfaces and covers topics including adsorption, Langmuir isotherms, heats of adsorption, BET isotherms, physisorption, chemisorption, precursor adsorption kinetics, well-defined surfaces, UHV, surface sensitivity and selectivity, surface diffusion and electrons interacting with matter. The final chapter contains a series of worked examples and problems, bringing together the various strands developed in Chapters 1-3 in order to elucidate surface phenomena. The book is unique in its mix of Classical and Modern surface science and should be relevant to physicists, chemists and material scientists.

Reviews

This book is great. It is written in simple words and not difficult to understand. I discovered this pdf from my dad and i suggested this ebook to find out.

-- **Prof. Webster Barrows**

This ebook is fantastic. We have read and i also am confident that i am going to read through again yet again in the future. I am easily can get a pleasure of reading a published ebook.
