With regard to the two circumferences S and T, we should have to point out the same properties that were pointed out as obtaining between the two circumferences S and O. It will be sufficient to indicate the following facts: Since if lies on the parallel circle which is the locus of points with distances from P and P in the ratio DP to DP , the ratio of MP to MP is the same as that of DP to DP ; therefore, the line MD is the bisector of the angle PMP , and it should pass through the mid-point G of the arc PG P ; then the three points M, D, G are in a straight line; the same is true of the three points D , M, G, as also of G, D, M and of...
